ALCOHOL AND REAGENTS

EDTA Decal Reagent

This EDTA Decal Reagent is a neutral pH aqueous solution of tetrasodium EDTA designed for gentle decalcification of tissue samples. Its mild, slow-acting formulation provides controlled removal of calcium deposits, making it suitable for tissue preparation during routine pathology and histology procedures.

BG745

SPECIFICATIONS

Construction
- An aqueous solution of tetrasodium EDTA, neutral pH

Capacity
- 1 gal

Quantity
- Sold in a case of 4

Performance
- Slow acting/mild decalcifying solution to be used as a decalcifier of tissue samples
