## **INTRODUCTION**

Set of four body slats elevate the body on a table during the autopsy or mortuary preparation. While elevated, waste drains without obstruction. Suggested placement of slats are head, shoulders, buttocks and heels. Made of a chemically resistant white polyethylene, each measuring almost 3" wide (7.6 cm) and over 22" long (57.5 cm), can be cleaned using water and one of Mopec's specially formulated cleaners.

## UNPACKING

- 1.) Carefully inspect the exterior of the shipping container before opening. If the crate is damaged and the product has sustained damage immediately contact Mopec and the freight carrier. **Never discard the shipping container even if it is damaged beyond recognition.**
- 2.) The receiver must note any suspected damage on the bill of lading and sign it. Mopec will help assist in filing a claim for product repair and/or replacement.
- 3.) Carefully open the containers and inspect the goods for concealed damage. If concealed damage is noticed (i.e. Broken welds, dented stainless, scratches, etc.) Follow through as noted above, and again do not discard the shipping material, they are important in settling claims.

## **CLEANING AND MAINTENANCE**

### **DISINFECTING AND MAINTAINING STAINLESS STEEL SURFACES**

The Poly surfaces can be disinfected with a non caustic disinfectant. We suggest using BE045 PathCloud or BE047 Bench Wipe for cleaning purposes.
