INTRODUCTION

Congratulations on your purchase of Mopec's JD600 Series Cadaver Body Lift with Straps.

The Mopec Cadaver lift body straps are designed to be used in conjunction with the JD Series Cadaver Lifts. Simply slide the nylon straps under the body and attach to the top elevating bar for easy and effortless cadaver removal.

JD600 Cadaver Body Lift Bar with Straps

Support Bars: 1-1/2", 11 gauge wall

Nylon Straps: 3", 54" basket

Basket Style: Rated at 500 lbs.

Fork Saddle: 14 gauge Stainless Steel

The JD600 is made of stainless steel with a #4 satin finish. All of the components used in the fabrication are stainless steel unless otherwise specified. All welds are a continuous type, smooth, free of burrs and brushed to remove any heat stains encountered during welding.

JD610 Bariatric Cadaver Body Lift Bar with Straps (Heavy Duty)

Fork Saddle: 14 gauge mild steel

Nylon Sling: Five heavy duty, 2" wide x 60" - 72" L - eye to eye

Support Bar: One heavy duty 60" long

Basket Style: Rated at 1000 lbs.

The JD610 is made of mild steel tube with a powder coated finish. All welds are a continuous type, smooth, free of burrs and brushed to remove any rough edges encountered during welding.

Your comments and suggestions are always welcome, so call and let us know what you think of the JD600 Series Cadaver Body Lift

UNCRATING

The first step to installing your new Mopec JD600 is to carefully inspect the exterior of the shipping container before opening. If the container is damaged or the product has sustained damage, immediately contact Mopec and the carrier. Never discard the shipping container even if it is damaged beyond recognition. Mopec will help assist in filing a claim for product repair and/or replacement. Carefully open the container and inspect the goods for concealed damage. If concealed damage is visible, (ie. broken welds, dented stainless, missing parts, etc.) follow through as noted above and contact us immediately. **Do not discard the shipping container. Damaged shipping containers are vital to settling claims.**

Once you have confirmed that you have all the required parts, take the parts to your cadaver lift.

Center the bar so the holes are on each side of the JD710 Cadaver Lift lifting arms.

Note: The optimal placement would be in the center of the forks to disperse the weight, however, placement of the bar will depend on the cadaver being picked up with the lift. Follow Lift Guidelines for the load being picked up.

CLEANING

All stainless steel surfaces can be cleaned with soap and water, which will remove debris.

The stainless steel surfaces can be disinfected with a non caustic disinfectant. We suggest using BE045 Path Cloud or BE047 Bench Wipe for cleaning purposes. We recommend you **DO NOT USE** a bleach solution to clean your unit, bleach will eventually erode stainless steel if not thoroughly rinsed. **The use of chlorine bleach will VOID THE STAINLESS STEEL WARRANTY**

During the cleaning we suggest wiping the surface in the same direction as the satin finish which will help elevate dirt from the grain finish.

Scratches can be removed simply by utilizing a "non-metallic" abrasive pad and rubbing in the same direction as the satin finish.

Painted surfaces can be cleaned with a non-abrasive cleanser or soap and water and disinfected as directed by your facility.
