Production Capacity

Emergency response organizations, Medical Examiner offices, hospitals, morgues and funeral homes across the country are quickly depleting stocks of standard duty bags. This sudden demand has left the few body bag manufactures and suppliers in the country with the inability to keep up with the demand. Even with adding more employees and multiple shifts, body bag manufacturers are reporting backlogs of three to six months, or longer.

Mopec has secured production of 1,500 BE171 bags per day.
