

Mopec *Casework*

**AMERICAN-MADE STAINLESS STEEL,
DESIGNED FOR YOUR WORKFLOW.**

Your Partner in Laboratory Design

At Mopec, we understand that a laboratory is more than just a room with equipment - it's a high performance workspace where precision, safety, and efficiency are paramount. That's why we approach every project with a deep understanding of how thoughtful design and reliable equipment directly impacts your team's performance.

UNRIVALED EXPERTISE

Leverage our decades of experiences in pathology and autopsy environments.

LASTING QUALITY

Our commitment to quality ensures your lab is perfectly tailored to your needs.

SEAMLESS PROCESS

We provide a smooth experience, from initial design to final installation.

Casework Built for Today's Labs

When you choose Mopec, you're not just buying cabinets and counter tops; you're investing in solutions engineered for performance, safety, and longevity.

UNMATCHED DURABILITY

Built for longevity, our casework is meticulously crafted from heavy-gauge, American-made stainless steel, offering superior resistance to daily wear. This premium-grade construction is the ideal choice for demanding laboratory environments where reliability is paramount.

WORKFLOW-CENTRIC DESIGN

We go beyond standard sizes. Our team works with you to design a lab that enhances ergonomics, optimizes your processes, and creates a highly efficient workspace. Whether you're building a new lab or upgrading an existing one, we ensure every detail supports the way your team works best.

END-TO-END PARTNERSHIP

From the first drawing to the final installation, your dedicated Mopec sales representative is your single point of contact, ensuring a smooth, transparent, and successful project. They manage all aspects of the process to ensure every stage progresses efficiently and according to plan.

Advanced Storage Solutions

Engineered for safety and specimen integrity, our tissue storage cabinets are a vital component of the modern lab. Whether your facility prioritizes airflow control, space optimization, or both, we offer solutions tailored to support your workflow and safety protocols.

VENTILATED TISSUE STORAGE

Protect your personnel and preserve specimens with our state-of-the-art ventilated cabinets. Designed specifically for superior airflow and chemical fume removal, they ensure a safe environment.

NON-VENTILATED STORAGE

For secure, high-density storage, our non-ventilated cabinets offer exceptional durability and organization. Featuring heavy-duty construction and configurable shelving for maximum capacity.

The Right Material for Your Application

In addition to our premier stainless steel casework, Mopec also offers a full line of durable, painted steel options to meet your specific aesthetic and budgetary needs.

STAINLESS STEEL CASEWORK

The gold standard for durability and hygiene. Ideal for high-traffic labs, sterile environments, and applications requiring maximum chemical resistance and longevity.

- Superior corrosion and chemical resistance.
- Easy to clean and sterilize.
- Timeless, professional appearance.

PAINTED STEEL CASEWORK

A versatile solution that offers exceptional durability with a modern aesthetic. Available in a wide variety of colors to match your facility's design.

- Durable, powder-coated finish.
- Wide range of color options.
- Excellent value and performance.

HAVE SOMETHING ELSE IN MIND?

Mopec will work with you to meet the needs of any project. Contact your representative for more information.

Your Vision, Seamlessly Realized

Our process is designed to be collaborative and transparent from start to finish.

1

CONSULTATION & DISCOVERY

We start by understanding your space, workflow, equipment and goals. We cover everything from ergonomics to aesthetic.

2

DESIGN & QUOTATION

Our team provides a comprehensive quote, ensuring every detail is accounted for. We'll iterate with you until it's perfect.

3

MANUFACTURING & DELIVERY

Once approved, your casework is precision-manufactured in the USA and delivered to your site, ready for installation.
