PREPARATION. PREVENTION. PROTECTION.

Mopec Guardian Systems

COMPREHENSIVE MASS FATALITY SOLUTIONS

When every second counts, Mopec Guardian Systems deliver confidence and control. Our rapidly deployable, fully equipped, and purpose-built systems ensure your facility is prepared to respond to any mass fatality scenario with efficiency, safety, and respect.

Whether you are navigating a surge in caseload, a renovation, or a new construction project, Guardian Systems eliminate the need for inconvenient and costly off-site storage. Engineered with user safety, temperature reliability, and ease of deployment in mind, each system is designed for dependable performance in even the most challenging environments.

RELIABLE SOLUTIONS FOR CRITICAL SCENARIOS

The Mopec Guardian line offers a trusted, flexible solution for both temporary and long-term storage needs. Our systems are relied upon by hospitals, medical examiners, emergency management agencies, and military organizations across the country.

Available in configurations ranging from 8-body to 35-body capacity, our mobile morgue systems can be rented or purchased to suit both immediate and long-term needs. Every system is engineered by Mopec's expert design team to provide industry-leading functionality, worker protection, and the respectful handling of decedents that our customers and communities depend on.

Guardian Pull-Behind Trailer

The cornerstone of our Guardian Systems line, this self-contained trailer is designed for rapid deployment to any location, providing a secure, climate-controlled, and compliant solution when you need it most.

- Multiple capacities available
- On-board generator for independent operation
- OSHA compliant and built for easy decontamination

Deployable Infrastructure

Beyond our mobile trailers, Mopec offers a complete line of containerized body storage and morgue infrastructure solutions engineered for scalable, longer-term, or stationary deployment in virtually any environment. These durable, climate-controlled systems are ideal for emergency response, hospital surge capacity, and remote or semi-permanent operations.

Available in multiple configurations, Mopec containerized systems are designed to meet specific capacity, workflow, and environmental requirements.

GUARDIAN CONTAINER SYSTEMS

Mopec's Guardian Refrigerated Containers sit at ground level for easier loading and unloading and are the ultimate solution for anyone that needs additional on-site refrigerated space. These containers come in two options: the 20' container capacity is 16 bodies and 40' can hold up to 50 bodies.

MOPEC MERC SYSTEM

The patented Mopec MERC System® is a liquid based cooling system. The liquid is transferred through a system manifold and out to the cooling pad which removes the heat from the body and returns the heated fluid to the system to be re-chilled and continually recirculated. The Mopec MERC System eliminates the need for large, stationary coolers, or refrigeration units.

Essential Racking Solutions

All Mopec Guardian Systems are designed to be equipped with heavy-duty, purpose-built racking that ensures the secure and efficient storage of decedents in any situation.

Constructed from high-quality materials, our racking solutions meet the industry's highest standards for safety, sanitation, and durability; ensuring dependable performance when it matters most.

GUARDIAN RACKS

The premier heavy-duty storage solution for refrigerated trailers and other temporary cooled structures.

- Easily assembles with only 8 bolts
- Holds up to 1,500 lbs.
- Available in 3, 4, and 5 tier designs.
- Large, heavy-duty lockable casters

MRS CADAVER RACKS

A quick deploy cadaver storage system designed for rapid transport and efficient storage.

- Heavy-duty steel tubing with removable roller guide rails
- Collapses to only 10" deep for storage
- Available in multiple widths, tiers, and colors to suit your needs

Your Partner In Government Procurement

Providing reliable, compliant, and American-made solutions for pathology, mortuary, and emergency response needs across federal, state, and local agencies.

A LEGACY OF RELIABILITY & EXPERTISE

Mopec provides American-made medical equipment, laboratory products, and emergency preparedness to the pathology, histology, necropsy, autopsy, and mortuary industries. Founded in 1992, Mopec solutions are among the very best as demonstrated by the vast number of installations in America's top healthcare institutions and facilities. Mopec is the expert in safe and respectful decedent handling, with 29 years of experience working with almost all of the leading hospitals and medical examiners in the country.

CORE COMPETENCIES

- Emergency Response Products
- Surge Capacity Temporary Morgue Systems
- Mobile Morgue Storage Unit Rentals
- Morgue Design & Installation
- Laboratory Design & Customization
- Stainless Steel Pathology, Anatomy, & Mortuary Equipment
- Body Bag Manufacturing & Distribution
- Laboratory Consumables Distribution
- Personal Protective Equipment

PAST PERFORMANCE

Mopec is the trusted name in virtually every county throughout the U.S. as the nation's leading provider of equipment and supplies for the pathology, autopsy, and mortuary industries.

- Department of Defense
- Department of Veterans Affairs
- Department of Health & Human Services
- Indian Health Services
- Department of Justice
- Department of Homeland Security
