

Electrostatic Pre-filter for Downflow Workstations

A pre-filter designed for the Reveal Ductless Downflow Workstation that captures airborne particles and aerosols before they reach the main filtration system. It helps extend the life of downstream filters while maintaining efficient airflow and safe workstation operation.

For reference only: Reveal Ductless Downflow Workstation

SPECIFICATIONS

Construction

- (1) filter provided upon purchase of the ductless downflow workstation
- Electrostatic pre-filter used inside the ductless downflow workstation

Utilities / Power

- 2 options:
120V/60Hz
220V/50Hz

Quantity

- 6 per package

Performance

- Check every 30 days
- First layer of filters that uses static electricity to trap particles in the air before reaching the main HEPA filter
- Helps the workstation last longer and perform more efficiently
