EVIDENCE COLLECTION

Synthetic Blood

This Synthetic Blood eliminates the possibility of pathogens originating from the use of human and non-human blood in the classroom. It accurately mimics the chemical composition and appearance of crime scene blood, giving positive reactions to the common chemical tests for blood such as Luminol, Phenolphthalein, hemoglobin crystal tests such as Takyama, and protein enhancement techniques such as Leucocrystal Violet or Amido Black.

FS356

SPECIFICATIONS

Performance

- Mimics the chemical composition and appearance of crime scene blood
- Gives positive reactions to common chemical tests for blood

Capacity

- 8 oz
