SPECIMEN COLLECTION

Urine Adulteration Test Strips

Test Strips are plastic strips with reagent pads designed for semiquantitative screening of urine sample integrity prior to drugs-of-abuse testing. The ready-to-use, disposable strips require no equipment and allow a simple dip-and-read visual comparison after 60 seconds.

FS536

SPECIFICATIONS

Construction

- Plastic strips affixed with (7) reagent pads
- Pads are chemically treated with specific reagents to provide for semiquantitative tests
- Includes detailed instruction sheet

Performance

- Results in 60 seconds
- Visual comparison of pads with color chart on the container label
- Can detect: creatinine, nitrite, glutaraldehyde, pH, specific gravity, bleach, and pyridinium chlorochromate

Quantity

- 25 per pack
