

Fluorescent Blood Lifting Strips

The Fluorescent Blood Lifting Strips are designed to quickly lift and preserve bloody impressions from crime scene surfaces for forensic analysis. They use fluorescent technology to enhance visibility and create permanent, non-smear lifts from a wide range of surfaces, including large or immovable objects.

SPECIFICATIONS

Construction

- Can easily lift and preserve bloody impression evidence from virtually any surface

Options & Accessories

- FS544: Activator Solution (sold separately)

Performance

- Process is completed in seconds
- Lifts are permanent where they cannot be smeared or smudged
- Enhances visibility under an alternate light source (ALS) or forensic laser
- Requires the activator solution to work (sold separately)
