

Latent Print Developing Mitt

The Latent Print Developing Mitt is an ergonomic, disposable tool designed for rapid recovery of latent fingerprints from large, smooth surfaces. It is used with forensic powders to efficiently collect prints without damaging ridge detail.

FS616

SPECIFICATIONS

Performance

- Dust large surface areas in seconds
- Preserves fine ridge detail without smearing
- Improves powder adherence for clearer prints
- Reduces time compared to traditional brushing methods
- Single-use design helps prevent cross-contamination

Quantity

- 10 per package
