

Triple A Atomic Latent Print Powders

Triple A Atomic Latent Print Powders are high-quality forensic powders designed to develop and enhance latent fingerprints on a variety of surfaces. Featuring fine particle consistency and strong adhesion properties, these powders provide clear, high-contrast print visualization for accurate evidence collection in crime scene and laboratory applications.

SPECIFICATIONS

Construction

- Extra smooth, non-caking formula and application
- Moisture-free

Capacity

- Available in 2 oz, 8 oz, or 32 oz jars

Performance

- Develops latent prints on nearly any surface
- Effective on both aged and fresh fingerprints
