

# Ammonium (Nitrate) Test Kits

The Ammonium (Nitrate) Test Kit provides fast, safe, and reliable on-the-spot detection by identifying ammonium ions and then used to see if there is Ammonium nitrate, using sealed, contact-free ampoule technology. It delivers clear results in seconds, requires no mixing or measuring, and is designed for simple use with high sensitivity to trace residues.

FS409

## SPECIFICATIONS

### Construction

- Easy-to-crush numbered, glass ampoules

### Performance

- 3-year expiration date
  - Color test based on the Nessler reagent system for detection of Ammonium ion
- Used to confirm the presence and identity of Ammonium nitrate with FS411 (sold separately)

- Clearly visible colors for identification
- Immediate, reliable results
- Environmentally safe
- No chemical leakage
- Chemical-free experience for operator
- High sensitivity to trace amounts
- Simple to use

### Materials

- Plastic
- Glass

### Quantity

- 10 test kits

### Options & Accessories

- FS411: TNT/RDX, PETN/Nitrate Test Kits
