

Ninhydrin Acceleration Development Chambers

A humidified incubation chamber designed to accelerate the development of ninhydrin-processed evidence on paper and other porous materials through controlled temperature and humidity.

FT217

SPECIFICATIONS

Construction

- Spring loaded, self-closing, double-paned, hinged glass door
- (1) Fluorescent lamp with guard and switch
- (4) Epoxy coated wire shelves
- Safety glass door for monitoring evidence
- Casters for mobility

Utilities / Power

- 110 V / L530R

Dimensions

- External dimensions: 33" W x 31" D x 78.5" H (+ 3" with casters)
- Internal dimensions: 29" W x 27" D x 55" H / 25 d.f. Capacity
- Shelves: 28.5" x 23.5"

Materials

- Stainless steel
- Glass

Performance

- Temperature and humidity microprocessor controls with digital displays
- Controlled relative humidity from 50 - 80%
- Controlled heat range 20 - 50° C
