

BlockBox Touch

The BlockBox Touch is a collapsible Faraday enclosure that allows secure use of touch screen devices while blocking wireless signals. It is made with water-resistant ballistic nylon, multi-layer shielding fabric, and a transparent viewing window.

FS406

SPECIFICATIONS

Construction

- Collapsible for easier transport
- Fits cell phones, tablets, and similar size devices
- (1) Carrying case
- Built-in:
 - (1) Double layer conductive glove
 - (1) Large transparent window
 - (2) Pockets for accessories
- At least 2 layers of high-shielding Faraday fabric on all sides
- Dual paired seam construction
- Unique serial number for asset tracking

Materials

- Ballistic nylon
- High-shielding Faraday fabric
- Water-resistant outer materials
- Padded interior walls

Dimensions

- Internal: 20" x 15.5" x 11.5"
- Folds down to: 14" x 10" x 2"

Performance

- Designed specifically for law enforcement and military forensic investigators for analyzing data on devices while shielded
- Large enough space for other accessories like batteries or data extraction tools
- Provides a way to operate and view touch screen devices while remaining shielded
- Completely isolates devices and blocks WiFi (2.4 & 5GHz), Bluetooth, cell signals, GPS, RFID, and radio signals (60dB-80dB)
